

Want a special Easter Dessert but not much of a baker?

One of our team shared this eggs-travagant idea for an Easter Egg Milkshake, very simple to make but we think it looks fantastic, and we are sure the family will love it too!

How to make:

- Unwrap the top of the chocolate egg leaving the rest of the foil on for effect, crack the top of the egg to get to the hollow and place it in a mug.
- Fill your egg with scoops of ice-cream and you could add raspberries or sliced strawberries in too.
- Now, top with whipped cream and then a squirt of ice-cream sauce, hundreds and thousands and finally top with mini eggs, the bits of broken egg (if you've not eaten them by this point) and voila your Easter Eggs-travaganza dessert is made!

Share pictures of your Eggs-travaganza dessert, we'd love to know how you get on!
